News Briefs

By Kyle Kamischke

iPhone sales could top 800,000

An announcement made Tuesday by the global financial firm UBS indicates that Apple, Inc. is on track to sell 800,000 iPhones by the end of the current quarter. The phone and electronics manufacturer had set a selling goal of 730,000 phones. The current fiscal quarter ends in September.

According to analyst Ben Reitzes, the demand for the iPhone is still solid after taking into account the initial launch excitement and expectations. Apple is also experiencing a high demand for their latest version of the iMac, which is pushing the company's profits up further.

Paramount chooses HD-DVD

Paramount Pictures and Dreamworks Animation SKG Inc. announced Monday that it plans to release all future high definition movies on HD-DVD and discontinue movie releases on Blu-ray Disc. This decision was made after the companies decided that the HD-DVD format offered better quality along with players that were lower-priced. Manufacturing costs were another consideration. The majority of the movie industry, on the other hand, is choosing to release movies on Blu-ray Disc, which has outsold HD-DVD 2-to-1.

Wal-Mart drops DRM

The retail giant Wal-Mart has decided to call it quits with Digital Rights Management (DRM) on all the MP3s they sell online. The new catalog of songs will be from both EMI and Universal Music Group. The songs will cost \$0.94 per track or \$9.22 per album. All the songs will be encoded at 256kbps.

VOLUME 43, ISSUE 0

Welcome to Rose from President Gerald Jakubowski

To the Class of 2011, welcome to Rose-Hulman! I am very happy to report that for the ninth consecutive year Rose-Hulman is ranked as the number one engineering school in the country by U.S. News & World Report among schools that give the baccalaureate and master degrees, but do not give the Ph.D. degree.

In addition, U.S. News & World Report has given number one rankings to five of our engineering programs -- chemical, civil, computer, electrical, and mechanical engineering.

As you may already know (or soon will find out), Rose-Hulman is an incredible institution. There are, I believe, certain characteristics that make us stand out above other institutions. What are these characteristics that make us unique? I believe there are six of them.

First, it's the exceptional quality of the students that come to Rose-Hulman. I've discovered that not only are our students technically bright, but they also come to us with a broad array of interests and are highly motivated.

Second, it's the dedicated faculty and staff that work at Rose-Hulman. The faculty members are truly dedicated to teaching and they spend a tremendous amount of time with the students beyond the classroom. I've also discovered that all staff members -- including our beloved housekeepers -- play as large of a role in educating the students as the faculty. It's fantastic for me to see how all faculty and staff are willing to meet, help, advise, coach, mentor, be a friend, etc. to any student at any time.

Third, it's the curriculum that we offer. Our academic programs are traditional in nature, but also current. Faculty members -- through their own personal experiences -- bring to the classroom the latest techniques being used in industry and are constantly revising the curricula. Accordingly, students are able to "hit-the-ground-running" immediately following graduation.

Fourth, it's our hands-on, project-based approach to learning. It's one thing to learn the material between the covers of a book, but it's another to be able to apply it. The faculty members really challenge the students along these lines, which results, once again, with students being able to "hit-the-ground-running" immediately following graduation.

Fifth, it's the spirit of community that exists. Rose-Hulman is truly a community of faculty, staff and students. We're like a family where we care about one another and look out for each other. No one person is any more important than anyone else.

Sixth, it's our co-curricular activities. Our classes end at 5:10 p.m. offering students time to complete homework assignments, work on projects or participate in over ninety different clubs and organizations.

I would like to expand briefly on this last characteristic. There is no doubt in my mind that all students attending Rose-Hulman will receive an excellent technical education. However, there is much more to a college education than what you learn between the covers of a book or in a classroom. Being technically competent is not enough in today's competitive world. Students need to "round-out" their education by getting involved in co-curricular activities.

According to a recent report by the National Academy of Engineering entitled, "The Engineer of 2020", engineers, scientists and mathematicians need to be much more than just technically competent. In addition to strong analytical skills, the academy suggests that engineers, scientists and mathematicians need to: exhibit practical ingenuity; be creative inventors and innovators; be excellent communicators; have high ethical standards and a strong sense of professionalism; understand the principles of leadership and the principles of business and management; be dynamic, agile, resilient and flexible; and have a desire for lifelong learning.

So, in order for you to learn these personal skills -- what we call the development of the whole person -- it is necessary for you to take advantage of the smorgasbord of opportunities that Rose-Hulman offers, not just the courses we offer, but to take advantage of the co-curricular activities as well.

I am amazed at how many of our students take advantage of the opportunity to get involved in our co-curricular activities from participating in athletics to getting involved with the drama club. Through these activities students develop character and learn leadership, management, and personal skills that prepare them for their future professional careers.

I urge you as freshmen to get involved and to get involved early. We are small enough that virtually everyone gets a chance to participate in just about any activity where you may have an interest. We believe that these activities are just as important as the curriculum in developing the whole person, thus the term "co-curricular."

I am honored to be serving as President of this great institution. I pledge to do my utmost to maintain the culture and traditions that have made Rose-Hulman what it is today. However, it is up to you as well to help maintain this culture and tradition that has been charted by students who have come before you.

You have come to a very special place that with your arrival just got better!

Sincerely,

Gerald S. Jakubowski, PhD, PE
President

Joseph Barlan / Rose Thorn

President Jakubowski answers student questions during an interview with The Rose Thorn in this file photo. President Jakubowski was inaugurated as the thirteenth president of Rose-Hulman on April 27, 2007.

AROUND TOWN

Advice for freshmen

4
FLIPSIDE

A taste of Terre Haute

by Aaron Meles, Chris Casillas, & Mike Ferguson

Mogger's

Directions from Rose: Take a left onto S.R. 46, then right onto Poplar Street. Follow Poplar until you get to 9th Street, where Moggers will be on the right.

One of the better-known local favorites, Mogger's offers a wide range of American foods and prices. Holding on to its brew house origins, Mogger's still makes its own brand of beer, Champagne Velvet, and offers an impressive array of other beverages. Known for its delicious burgers (the Waterstreet Melt is a favorite of mine), Moggers offers a full menu, from sandwiches (\$5-\$10) to full-blown entrees like pork chops or steaks (\$10-\$25). Whatever you order, be sure to get a Mogger's salad with it. This almost lettuce-less salad is covered with bleu cheese and house dressing, and is one of the few restaurant items I consistently crave even after three years of living in Terre Haute.

Exotic Thai

Directions from Rose: Take a left onto S.R. 46, then take I-70 West, and get off at the first exit, which will be 3rd Street. Turn right out of the exit. Exotic Thai will be on the left shortly after crossing Washington Street.

One of the more unique ethnic restaurants available in Terre Haute, Exotic Thai offers a wide range of delicious Thai food at incredibly reasonable prices (\$5-\$15). Despite its location, the small restaurant has a comforting southwest Asian ambience, quick service, and is surprisingly almost never busy. There are three types of curry available to the discriminating patron, all of which are excellent and offer various levels of spiciness. One can hardly go wrong when choosing from the menu, although the Pad Thai and peanut chicken are some of my favorites. Make sure to bring cash when you visit, however, as there is a minimum purchase limit for using credit cards (\$10).

George's Café

Directions from Rose: Turn right out of Rose onto Wabash. Take Wabash into town and turn right onto 7th Street, then left onto Cherry Street. George's is on the left.

Right across the road from Indiana State University, George's Café offers a very reasonably priced menu of Mediterranean cuisine (\$5-\$15). Physically, the café is very simple and, well, café-like. But what George's lacks in ambience it makes up for in great and unique taste. Stuffed grape leaves, pitas, hummus, gyros, and baba ghanoush are all great picks from George's menu. Combination plates are available for those looking to explore or simply can't make up their minds. Make this stop a Saturday meal, however, as George's is closed all day Sunday.

Mario Brothers Mexican Restaurant

Directions from Rose: Turn left out of Rose, going east on U.S. 40. Take this for 15-20 minutes until you enter the town of Brazil. Mario Brothers is on the right hand side near the middle of town.

A lot can be judged about a Mexican restaurant by the quality of the free chips and salsa offered before the beginning of the meal, and Mario Brothers is no exception. The Mario Brothers Mexican Restaurant is simply my favorite Mexican restaurant in the greater Terre Haute area, with so much more to offer than an entertaining ethnic paradox of a name. The service is always fast and the food is always superb and reasonably priced (\$5-\$10). As an enchilada fan, I can vouch for both the size and quality of Mario Brothers enchiladas, but I feel like the restaurant's crowning achievement is its melted chicken fajitas, which are a culinary delight that I haven't seen paralleled anywhere else in the world of Mexican food.

Market Bella Rosa

Directions from Rose: Turn right out of Rose onto Wabash. Take Wabash until you pass 7th Street – Market Bella Rosa will be on the left before you reach 6th Street.

If you're ever looking for a lunch away from campus, you can't go wrong with picking up a sandwich from the counter at Market Bella Rosa. As an establishment that hosts regular wine tastings in the fall, Market Bella Rosa carries an air of culture without the price tag. Sandwiches run between \$5-\$10, while soups and salads also sit at wallet-friendly levels. Sandwiches are loaded with fresh greens, meats, and cheeses, and can be packaged to go in several minutes for the short ride over to Deming Park or elsewhere. The deli itself has a very nice seating area, which will get busy during the lunch rush, but can be almost empty at other times. Finally, always remember to place your cans and bottles on the counter for recycling.

Kleptz's Tavern

Directions from Rose: Turn left out of Rose. The restaurant is right off U.S. 40 on the outskirts of Seelyville.

Kleptz is an excellent family sit-down restaurant that has a nice variety of food and has a nice homey feel to it. From what I've heard, the bar is excellent and cheap. Their Philly Cheese Steak Sandwich and French Dip are great, and supposedly their menu changes daily so the same food isn't served all the time. It reminds me a lot of the food Moggers offers but minus the brewery aspect.

European Grill

Directions from Rose: Take a left onto S.R. 46, then right onto Margaret Drive. Follow Margaret until you get to 5th Street, where the European Grill will be on the right.

If you are in the mood for fine European cuisine, one of the best kept secrets in Terre Haute may be European Grill. With five-star quality and service at a two-star price (\$5-\$15), European Grill offers a variety of savory entrees guaranteed to tickle your palate. The menu ranges from an array of pasta and seafood dishes to delectable chicken, veal, and lamb meals. You can get steak or ribs hot off the grill and there is also a vegetarian section for those of that persuasion. Whether you're going out after an exhausting homework session or serenading that special someone in the romantic ambience, the European Grill has what it takes to sweep you away from Terre Haute and place you in the foothills of Tuscany.

Rose turns over new leaves

Chris Casillas
Copy Editor

Confused yet? You will be if you don't read this article.

Coffee Stop

The new coffee shop is located on the second floor of Moench between the Computer Science Department and the double doors leading into the hallway. It is directly in front of stairs.

The operating hours are 7:30 am to 2:30 pm and according to Mark Farner, "we'll evaluate those hours after we're open for a while to make sure they are the best hours based on student, faculty, and staff need."

They will accept cash, credit cards, and DB from any meal plan. "We're not sure if the network connection will be up and running as soon as the cart is open so we may not be able to accept DB until a few days after the cart has opened."

President Jakubowski's thoughts

"It didn't make sense in a management and efficiency point of view. We needed to expand the Admissions Office and improve the look. We really wanted a welcoming environment to the parents and students."

"Rose had a lot of areas that needed improvement."

"I'm really pleased with what we accomplished this summer."

"The whole purpose of this was to make sure the students benefit from this... students pay a lot of money so they need first class facilities."

Student IDs

All students will be receiving new key cards. These new key cards have RFID transmitters in them and will be able to access whatever department rooms that student's major enables them to. It will also grant them entrance into the academic building and into some of the dormitories.

With the talk about the new cards, it became apparent that all the students will be required to have their ID on them all of the time.

SRC

More offices have been added to the SRC. After you past the turnstile when you walk through the front entrance, there will no longer be an approach to the balcony overlooking the fieldhouse, but instead will be a wall with a door that leads into the new offices for the staff members at the SRC.

There is also a wall right next to the stairs leading downstairs, so the easiest access to the balcony to look out into the Fieldhouse is to walk down the hallway by the snack stand.

Dormitories

Speed hall has a new patio and handicap ramp in front of the building

Deming hall has new carpet, as well as a new staircase leading down to the SRC along with an extended sidewalk.

BSB has new room doors and new carpeting

Scharpenberg has new plumbing.

Hulman Memorial Union

Since Financial Aid will be moving into Hadley Hall on September 17, changes will be noticed in the Student Affairs office. Erik Hayes will move into Melinda Middleton's current office. The GA office from upstairs in the club hallway will move into Luan Hastings's office. Karen DeGrange will move into Hayes's old office. Her old office will be turned into a storage room. The room next to Hayes's old office will be turned into the "technology" room where they have the printer and camera for student ID's. This will provide more office space for Kim Jones.

Upstairs, the Student Services offices were remodeled to provide each staff member with a larger office space and more accessible from both sides. Sandra Keaton, Carey Treager-Huber, and Donna Gustafson now have a small hallway between their offices and Gustafson has a door leading into the clubs hallway. The

clubs hallway was rearranged to accommodate for the larger offices needed and the GA office was removed. All of the clubs that were located in the hallway are still located there.

Another change that will be very noticeable to all returning students is the front of the Union. This area, now called "The Patio" has a new look to it. There have been a few benches added, new tables with umbrellas, hanging plants, and new banners have been added.

There is also going to be activities put on by Student Services. Treager-Huber mentioned that there is going to be a Hawaiian Ice Car during the fall and spring quarters, a popcorn machine, as well as other events that they have not finalized into a schedule by publication date. "We are working with different offices to have different activities... we really wanted to expand the Union onto The Patio."

Chris Casillas / Rose Thorn

Construction started at the beginning of the summer and continued throughout the season. Most of the changes will be completed by the time classes resume.

Hadley Hall

Hadley hall has been redone to incorporate two new offices and a new receptionist area for Financial Aid as well as a new receptionist area for Admissions which is being deemed the "Welcome Center" along with redoing the corner office in the Presidential/Professor Pictures hallway for Jim Goecker, the Dean of Admissions and Financial Aid.

Admissions has completely been redone to provide an office for every Admissions staff member, as well as provide some additional space for Human Resources. Admissions also has a room completely dedicated to the reading/processing of applications for admission. The previous process was really unorganized according to Jim Goecker.

Goecker also mentioned how "We have been working in the same space since 1985 and the way we worked has changed." "As of 2 years ago...Financial Aid reported to me." "[The remodeling] helped address other space needs."

During the summer, Admissions was using the Business Office Conference Room and another classroom to conduct all their work and the several Admissions open houses that happened during the summer. "It is a better service to the students [and is] the center of campus." "It is a real gain in efficiency and presentation. We're excited."

"Give Dr. Jakubowski the credit for recognizing the need and providing it."

Admin Services/Mailroom/Print Shop

The Administrative Services offices are now located in a new addition to the Facilities building. In addition to Administrative Services, the Printshop is located in the Facilities building. Also, Mail Processing, which dealt with shipping out mail, is now located in Facilities as well.

Part of the old Mail Processing room (where the double doors are, next the exit from the commons) is now where faculty and staff are to pick up their packages. Also, it is for people to drop off envelopes and packages that are already postage paid, or will be charged to an academic department.

Across from Mail Distribution is a kiosk for DHL and USPS to print and buy labels for packages to be sent from campus. The kiosk only takes credit cards. A machine next to it offers stamp books in quantities of ten or twenty. In

order to purchase individual stamps, or any other stamps besides 41 cent stamps, it is necessary to travel over to Facilities to purchase stamps or to mail out packages if the kiosk isn't suitable. There is also a kiosk in the Union next to the ATM machine, and the Bookstore also deals with mailing out letters and selling stamps. As of publication, if clubs or other organizations besides academic departments want to charge their purchase at either the bookstore or the kiosk, they will need a credit card for that organization, and if there isn't one available, it is necessary again to travel over to Facilities.

There are no changes to the Mail Distribution Center, but after school is in session, it is going to be required that all students have their own ID to pick up their own package, with no exceptions.

Moench/Olin Hall

With the changes to Administrative Services, all of the previous offices for them will now be for the Engineering Management department. With the removal of the Printshop from the basement of Moench Hall, freshman design for Mechanical Engineers will be located here to help accommodate the needs of the upperclassmen to use the machine shop. The rooms that help form the Mechanical Engineering hallway have been remodeled. The larger lab used for Mechatronics and other laboratory classes has been split into two rooms. One room is dedicated for the lab for Mechatronics and other courses, and the other room is now a study room for the mechanical engineers. This study room has occupancy of around 24 students and some addi-

tional computers for research and CAD drawing.

The chemistry laboratories are also being remodeled and updated.

Construction went on in the High Bay Lab as well.

Jenny Hancock - Cartoonist

A message from the Man

Aaron Meles

Editor-in-Chief

Welcome to Rose-Hulman Institute of Technology! My name is Aaron Meles, Editor-in-Chief of this fine publication, which has meetings with free pizza every Wednesday at 5:15 pm in O157. When Alex Clerc, the award-winning journalist and new Flipside Editor, asked me to write some advice to the freshmen, I immediately thought of a dozen different things I could artfully advise you on. However, my original background in writing Top Tens for the Flipside hasn't fully worn off after three years, so instead of picking just one topic, I organized them into short, easy-to-read bullet points. Ironically, there are five of them. Read it, learn it, live it.

1.) Don't make an e-mail signature. And if you have to, make it be just your name and maybe some contact information. There is no way that every person who receives an e-mail from needs to know that you are Vice President of the Sausage Club, Undersecretary of the No-Girls-Allowed Council, Small Group Leader of the Society of Hangar Benders, Member of AXE, Certified Seeing Eye Dog, etc, etc, etc. If you won't put enough effort into writing the e-mail to be able to type the appropriate title beneath your name, then obviously your e-mail isn't be worth reading.

2.) When you walk, walk in a direction. I know the dorm walls around here are made of solid lead and that you couldn't get a gamma wave out of them, let alone a cell phone signal, so it's perfectly legitimate to place

a call outside. But for the love of all that is holy, don't wander aimlessly on the eight foot square slab of concrete outside your dorm for half an hour! This is called Rose Marching, and it's a problem. Choose a destination. Walk around Speed Lake. Walk around the track. Walk around your freaking dorm for all I care, just make it look like you're going somewhere! You look like a bunch of zombies. I will take your picture. I'll do it. And print it. So pick a location and walk there. Or sit.

3.) Make sure you are totally aware of your cursor when you reply to an e-mail. The "reply all" button is a powerful tool, but as Aunt May would say, "With great power comes great responsibility." If I had a nickel for every time I found out how many meals some random dude wanted to convert to DB at the beginning of every quarter because he hit "reply all" instead of the regular old "reply", I would have 45 cents because that's how many quarters I've been here. Argh.

4.) Don't ever complain to an upperclassman about Terre Haute or the Rose curriculum or the girl-to-guy ratio or anything else that seems like an easy target. If it's that easy to make fun of, we've already heard it. And not "heard it" like we've heard someone complain about the same subject. We've "heard it" like we've heard that particular quip with exactly the same wording. We've all heard enough of it that it is mathematically impossible to produce a permutation that we haven't heard. Run along and tell your freshmen friends. There's a very slim chance they

haven't heard it yet.

5.) Don't ever nerd run. I repeat: Don't ever nerd run. This should be rule number one, but I want you to remember it, so it's going in last. There are very few reasons to have to rush to class, and none of them warrant running at an all-out sprint with your hands glued to your sides and head pointed squarely at the pavement. Do you think that if you don't swing your arms and not make eye contact, we won't notice that you're running? Au contraire! I personally will be laughing my head off at your hilarious form. I have also posted a \$5 reward for anyone who can capture the nerd run wild in its true and unstaged form. That last part is not a joke. In fact, none of this entry is a joke.

Well I think that's all I have for you. If you ever find yourself craving more, you can find me in O157 every Wednesday at 5:15pm, hanging out with boxes of pizza and a group of awesome people, running a club that looks great on your resume.

May your laptops be strong and your engineering paper never run out.

This day...

1814: The British army burns down the White House. This was seen by Americans as a much more popular move than the previous year's burning of the Mars Stinky Cheese Castle in Wisconsin.

...in history

Visit us at the Activities Fair Wednesday in the SRC! We need writers! We nede coPy editors! I'll be signing chests!

Welcome to RHIT!

I'm Alex Clerc (it's pronounced 'clare', a-hole), back from sab-batical in Germany, and as the Thorn humor editor I pledge to bludgeon you like a baby seal... with comedy.

But today, since you're new and definitely freaking out, I'll share the knowledge I've gained in my years at Rose. Calm yourself, and remember: the Way of the Clerc is the path to wisdom.

Training your Roommate

Did you know that there's only a 63% chance that your roommate came housetrained? If you want to have a good year, it's critical to have a well-trained roommate. Cow your roomie into submission from the start with a good mix of abuse (70% verbal, 30% physical). Feed him/her twice a day and make sure to let him/her out for potty, showers, and puking. If your roommate barfs on your floor/ bed/ laptop, make sure to rub their nose in it; eventually they'll learn not to.

Raising your grade

Everyone gets a bad grade on a test now and then, but the battle's not over until you give in. The Clerc encyclopedia prescribes several methods of forcing your professor to raise a grade, including:

a) Crying – Rose professors are known for their compassion, which is why I always carry an onion in my laptop bag.

b) Blackmail – digging up dirt on your prof will be tough, most are squeaky clean. But photo-shop can work wonders, and if you're on the Thorn staff, you get a free copy.

c) Staring contest – going to your prof's office to verbally reason, argue, or plead about your grade is losing its charm. A few minutes of silent, awkward eye contact has worked for me on two occasions.

d) Puttin' the moves on – you're

probably one smooth mamma jamma, so go use what your momma gave ya. Hitting on your professor to change a grade has a long and rich tradition at Rose; these days, it's pretty much expected of you. If the professor is not of your preferred gender, just remember: it's your duty as a budding engineer or scientist to keep an open mind and experiment. And to make videos and send them to me.

e) Buy a red pen – Changing a D to a B ain't rocket science. It may not go in the grade books, but you can show your mom and she'll give you money.

Playing Sports

Neither differential equations nor HALO nor golf are real sports. Real sports make you sweat. The best way to get on a sports team if you suck is joining an IM sports team. At least then you'll have a reason to shower.

Procrastinating

Being prepared is for losers. Procrastination will train you to work quickly and effectively under pressure. The benefits are numerous, including the chance to put the moves on your professor when you get a crap grade and more time for HALO.

Avoiding girls

This piece of advice is for all you men and lesbians out there.

The number one reason that students fail out of Rose is too much sex.

Getting a girl to be your study partner is a tempting option (after all, the females top the males in average GPA every year), but even a well-intentioned study sesh can quickly erupt into an orgy of hormonal im-

pulses. Before you know it, all of two minutes will be wasted and you'll have nothing to show for it but an awkward goodbye and a mess in your bed. The number one reason that students fail out of Rose is too much sex. Find less time-consuming ways to relieve your stress, like online HALO tournaments or playing Warcraft 10 hours a day.

Why aren't we taking showers?
